

## Leica ST5020 - Configurations

The following section describes two recommended configurations, i.e. fully equipped "ready-to-use" ST5020 Multistainer systems.

The configuration is addressing the needs of customers looking for configured staining systems for practically all common applications the ST5020 has been designed for.

One configuration can be ordered by one single order number. One additional benefit of ordering the configuration over the line items making up the configuration is a substantial saving for you
