Features

- Slimline door handle with integrated opening mechanism
- Reversible doors
- Flush with wall and with front ventilation suitable for installation in a row of kitchen units
- Height adjustable feet at front, castors and handles at back (60 cm models)

Automatic SuperFrost makes freezing a simple and energy-saving pleasure. It quickly reduces the

temperature and creates the cold air required for vitamin-preserving freezing. As soon as the food is completely frozen the Automatic SuperFrost switches back to normal operating temperature and therefore saves energy.

Plus, the drawers and shelves beneath them can also be removed. And that's how **VarioSpace** the practical system for extra storage space works, so that even the biggest cake quickly finds a place.

SmartFrost

The inside walls are especially smooth and easy-to-clean. The attractive intervening shelves made of glass and the transparent drawers are removable.
