

**HARMONY** [affordable style]

# HARMONY **[high back]**

Bringing together sleek, modern looks and a durable working chair, Harmony creates the right impression for any forward thinking office environment.

Comfort at work is essential to maintain constant productivity, so Harmony has been designed to cater for a complex range of possible working positions.

To resist heat build-up in the back area, Harmony features a breathable nylon mesh that provides improved air circulation and is also a lot more flexible when creating the preferred working position.

An adjustable lumbar support on all models in the Harmony range, enables the user to create the perfect posture support with absolute accuracy.

HH1

# HARMONY [medium back]

All swivel chairs feature an easy to operate depth adjustable back, soft touch width and height adjustable armrests, moulded seat foam and a smooth synchronised mechanism that can be adjusted to the weight of the user.

A chrome five star spider base is fitted as standard on all swivel chair models.

An option of chrome or brushed steel cantilever frame provides the opportunity to complement existing furniture.

Ultimately, the Harmony range of chairs will enhance any office design.
