LBMCA

Appropriate for task, executive, professional or home office, Liberty's chrome detailing and subtle lines create a classic look for a modern chair.

A lockable tilt mechanism means that Liberty can be a strong, supportive working chair as well as a relaxing executive chair. The tilt mechanism can be adjusted to the weight of the user.

Wooden capped armrests create a natural touch that compliments existing furniture or office surroundings and a chrome backrest handle bar is provided for ease of movement.

The sleek medium back cantilever is available as the visitor's chair to compliment the Liberty range.
