

ECLIPSE Stax Seating

Eclipse Stax seating is robust, versatile and excellent value for money.

The E1000 is stackable 7-10 chairs high and the E1000WTA stacks 4 high, making storage and rearranging simple. The robust oval tube frame makes the stax range a durable option, whilst deep seat foam ensures comfort over long periods of seating.

Plastic outer backs are firmly attached with 4 counter sunk screws which prevents them from working loose.

The E1000WTA displays the optional fold away writing tablet for conference use and a linking bracket is also available on all models to maintain a structured seating plan.
