

We are one of the world's leading suppliers of instrumentation, reagents and radiochemicals to the Life Sciences and Analytical markets. We have been able to assist Research and Teaching Labs with many of our novel technologies and our product portfolio includes the following :-

If this is an electronic copy go directly to the information by pressing ctrl and click at the underlined titles. You will go to the appropriate page on the PerkinElmer Web Site. If this is a paper copy please contact me directly for more information.

Assay Platforms	Radiometric and non-radiometric, plates and consumables
Atomic Spectroscopy	AA, Flow injection, ICP Optical, ICP MS
Chromatography	GC, GC-MS, Thermal Desorption, Headspace GC, HPLC
Consumables and Accessories	Consumables for all product lines
Genetic Screening/Diagnostics	Complete solutions to advance preventive medicine
High Throughput Screening	Liquid Handling, Luminescence Counters, Plate Readers and Imagers
Lab Automation	Liquid Handling robots and Dispensers
LIMS/Software	Chromatography Data Handling and LIMS Systems
Microarrays	Array Spotters, Processors, Scanners, and Analysis Software
Microscopy	Confocal Microscopy, FT-IR Microscopy
Molecular Spectroscopy	FT-IR, FT-NIR, UV/Vis, Fluorescence, Polarimetry
Proteomics	Gel Imaging and Analysis, Spot Picking Robot, MALDI-oTOF
Radioactivity	Scintillation Counters and Cocktails, Gamma Counters, Radiochemicals, Oxidiser
Thermal Analysis	DSC, DTA, TMA, DMA, TGA and TGA/DTA

If you wish to discuss any of these technologies please feel free to call or email me at any convenient time.

Thank you for your interest in PerkinElmer products
