

Ultrawave

Precision ultrasonic cleaning equipment

Ultra Analogue Benchtops

The Ultrawave range of analogue controlled ultrasonic baths can be used in many different applications. With sizes ranging from 0.5 to 4.5 litres in capacity, these compact ultrasonic baths are used in a diverse range of environments from medical and healthcare surgeries, to jewellers, tattooists, chiropodists and in the home.

Each Ultra Analogue Benchtop is supplied complete with stainless steel basket and ABS plastic lid which can also be used as a drip tray to collect excess water when the basket is removed.
