

Peristaltic Pump Specification Form

Is the fluid you are pumping hot or cold?

Are there any solids in the fluid?

How viscous of the fluid?

What is the approximate flow rate you require (in ml/min?)

On the suction side of the pump, what will the run length of tubing be and what will the height of the delivery vessel be above or below the pump?

On the discharge side of the pump, what will the run length of tubing be and what will the height of the collection vessel be above or below the pump?

Do you require fixed or variable speed?

Do you require an IP rated unit?

Do you require single or triple phase power supply?

Roughly how many hours per day will the pump be in use?
