2212 Starlet Bench-Top Portable Cryostat Specification

MADE IN BRITAIN

Introduction

Not since cryostats were invented has there been such a small, portable yet convenient instrument. Featuring many design concepts developed from our continuous research programme, the Starlet cryostat is available in a choice of either handwheel or lever operation. The size of the Starlet makes it ideal as a back-up instrument or for use in laboratories where space is at a premium. Fully portable, it can be transported with ease from laboratory to laboratory and is a must for use in the 'field' - the possibilities are endless.

If frozen sectioning is infrequent and a full-sized, full-priced cryostat cannot be justified, the Starlet does the job and fits any budget. Inexpensive and reliable, the Starlet, ideal where space and funds are limited, really is unique amongst cryostats.

Features and Benefits

- An ABS Polymer and rustproof steel cabinet coated with scratch, solvent and detergent resistant PVC to provide strength and durability.
- A polished stainless steel chamber with detachable cold storage bar and detachable storage shelf.
- Thermostatically controlled chamber temperature in the range ambient to -35°C with digital display.
- It uses disposable blades and incorporates the Easi-Set anti-roll plate.
- The Starlet cuts excellent sections just like a full sized cryostat.
- Small and portable.
- Incorporates the Magnaplate anti-roll plate system.
- Complete with all standard accessories to start sectioning right away.

The Compact Cryostat

Of an elegant appearance, durable and easy to clean, the Starlet cabinet is manufactured using scratch, solvent and detergent resistant ABS Polymer and Stelvetite Polymer coated steel. The chamber is of stainless steel construction and comes complete with a detachable quick freezer bar and detachable storage shelf. Easy to clean and resistant to common decontaminating agents, the working chamber is convenient to use.

Being relatively small the Starlet can provide rapid cooldown times, down to -35°C in the chamber with the detachable cold storage bar. While not in use, an insulated cover is pressed in place to ensure efficient running of the refrigeration system and also assists in reducing frosting. If the unit is transported, the chamber will remain cold for prolonged periods.

The Miniature Radial Microtome

Unique to and designed specifically for the Starlet, the microtome is of radial, flat cutting design and can be operated by either a handwheel or a lever. Weighing approximately 1.8kg, the microtome is capable of cutting a wide range of specimens including soft tissue, hair follicle, cardiac muscle and lung. The Magnacut disposable blade system is fitted as standard, using long-life disposable blades for quick results, and of course, it eliminates the inconvenience of knife resharpening.

Complete with an Easi-Set anti-roll plate, the Starlet is fitted with a 2-12µm feed screw for sectioning in 2µm increments, although a 4-24µm feed screw is available as an alternative. Taking only seconds to remove from the chamber, the microtome is easy to clean, resists corrosion and is easy to service. Very little routine maintenance is required.

Environmentally Compliant

The Starlet uses a HFC refrigerant blend that is in compliance with GWP guidelines.

Specification

Compressor Type	1 x 3.86cc displacement	
Refrigerant	HFC-compliant refrigerants	
Cooling Power	125watt at -35°C	
Lowest Set Temperature	Ambient to -35°C with automatic programmable defrost with manual override and digital display. Detachable cold storage bar.	
Cabinet	ABS Polymer and Stelvetite Polymer coated steel - scratch, solvent and detergent resistant.	
Cutting Stroke	30mm	
Maximum Specimen Size	22mm diameter	
Total Feed Range	10mm	
Knife Holder	Magnacut blade holder with long-life disposable blades and integral anti-roll system	
Object Holders	22mm	
Specimen Orientation	Adjustable tilt angle 0-12°	
Specimen Thickness Range	2-12µm in 2µm increments 4-24µm optional	
Dimensions	H315 x W465mm(min)/ 546mm(max) x D740mm	
Packing	Net weight: 40kg Gross weight: 48kg Packing dimensions: H400 x W920 x D550mm	

Weights vary according to specification of instrument

Shipping volume: 0.20m3

2212 Starlet

Order List 2021

PRODUCT	
Code	Description
2212-021	Starlet 2212 Cryostat for 22/240V AC, 50/60Hz Standard accessories include: Complete with: • Anti-roll plate. • Single refrigeration system (-30 degree). • Anti-roll plate. • Manual microtome with 2-12um feed. • Cleaning brush. • Magnacut knife holder with ten long life disposable blades. • Detachable shelf. • Magnaplate anti-roll plate system. • Debris tray. • Handwheel operation. • Specimen quick freeze (-40 degree) with digital display. • Programmable automatic defrost. • Operating manual.
2212-022	Starlet 2212 Cryostat (Same as 2212-021) for 110/120V AC, 60Hz
2212-024	Starlet 2212 Cryostat (Same as 2212-021) for 100V, 50/60Hz
