Smart Series

Introduction

Simultaneous monitoring of temperature and fluid level completed with smart, IoT and cloud management
 Aluminum alloy biological storage container cooled by liquid nitrogen (LN2) simultaneous monitoring of temperature and fluid level for ultimate sample safety.
 Storage temperature and LN2 fluid level are automatically and independently monitored with a high precision controller. Accurate and real-time information on the two critical parameters are available to ensure sample safety. Measurement with rulers and manual temperature device is no longer needed.

Key Features

- 5 models from 2400 to 6000 cryovial capacity
- 5 years vacuum warranty
- Durable aluminum construction
- Real time monitor of temperature and fluid level
- Cloud data storage for traceability
- Low consumption rate and high performance stability
- New lock design

Product Advantages

Color identification for pickup tool handle

Pickup tool handles are color coded for ease of separating storage zones and managing samples.

New lock design

Special and dedicated lock design is to assure sample safety.

Dual monitoring respectively for temperature and liquid level

Storage temperature and liquid level are automatically monitored by a high precision controller. Accurate and real-time information on the two parameters are available to ensure sample safety.

Multilayer protection for extreme safety

Temperature and fluid level are monitored in real time to safeguard the storage environment. Alarms can be transmitted through email, IM and wechat.

Cloud data storage for traceability

Temperature and fluid level data can be transmitted to Haier's IoT platform for permanent storage. All data are traceable and permanently stored.

Low consumption rate and high performance stability

The container is built with an automated process to ensure a high quality and a high vacuum. Stable performance and low consumption rate are achieved.

Note: Static evaporation rate is a theoretical LN2 loss rate. Actual evaporation rate and duration of operation will depend on the usage condition and ambient. The duration of normal operation is a reference number for a typical usage of a container system at normal conditions. The actual duration varies with loading, ambient and age of the equipment.

Haier Liquid Nitrogen Storage System
Biobank Series for Large Scale Storage

- LN₂ Splash Proof
- Data Logging
- Quick Chill
- Rapid Specimen Storage
- 5 Year Vacuum Warranty
- From 13000 to 94875 Cryovials
- Self Diagnostic
- "Dry" Sample Storage
- Lockable Lid
- Liquid or Vapor Phase Storage
- One-touch Defogging
