

## Modular Vacuum Systems, controlled Vacuum

## Chemically-resistant LABOPORT® Vacuum Systems with Condenser, Separator and two Vacuum Controllers

### Technical features:

- Maintenance-free
- Silent
- Simple connection to the line power (power plug) and to the pneumatic system
- Environmentally friendly
- Automatic vacuum control for two processes
- Controlled recovery of solvents, with high-performance condenser (at the pressure side)
- Collection of particles in the system (at the suction side)
- Easy to expand or convert

### SCC Systems, modular

The SCC vacuum systems are equipped with the LABOPORT-series chemically-resistant diaphragm pump of your choice (refer to the table/overview "modular accessories"). Fully-featured SCC systems have two vacuum controllers for two independent processes with just one pump. There is a wide range of applications for these vacuum systems in laboratories, whenever clean, constant vacuum is required.

The heart of the very compact LABOPORT pumps used in the vacuum systems is KNF structured diaphragm. This patented diaphragm was stress-optimized using the finite elements method. As a result, we were able to make the pumps smaller while increasing the service life of the diaphragm.

For laboratory applications, there is a wide variety of vacuum pumps with many different performance levels and various modular system components. The systems listed here are fully assembled at the factory. They can be converted quickly and easily; special tools are not required.

**Complete SCC vacuum systems (fully-featured) with:**  
**Chemically-resistant diaphragm pump of your choice,**  
**base plate, separator (suction side), condenser (pressure side), two vacuum controllers with electrical supply unit for controlling two independent processes, cabling and tubing ready to connect.**
