Liebherr's commercial freezers enable even large quantities of frozen food to be stored safely and economically: the static freezing system can be set to temperatures of between -14°C and -28°C.

Castors

The GG 52.. models are fitted with castors for easy, convenient cleaning underneath the appliances and for versatile use in different locations.

User-friendly and precise

The digital controller on the GG 52.. and GGU models allows the temperature to be set to exactly the degree wanted. Optical and acoustic alarms warn you if the temperature rises too high or if the door is left open. An all-round user-friendly solution.

Under lock and key

The freezers can be locked with a sturdy lock which is fitted separately from the strong handle.

Trayslides

The TGS 4000 comes with extra strong, adjustable trayslides for GN 1/1 size Gastronorm containers and bakery trays (600 x 400mm). The frozen food can be stored on up to 22 trays. Trays are not included.

Drawers

The completely enclosed drawers of the G 5216 and GGU 1500 models are very sturdy. Ideal for storing loose or small items of frozen food.

Undercounter installation

The GGU models can be sited beneath a worktop. In this case, a vent grill with cross-section of min. 200 cm² is required in the worktop for ventilation at the rear of the appliance. If no ventilation grill is fitted in the worktop, the aperture must be at least 860 mm high to ensure adequate heat dissipation to the front.

Freezers with static cooling – range overview

Model	Total gross/net capacity in litre	Exterior dimensions in mm (w/d/h)	Interior dimensions in mm (w/d/h)	Number of Baskets / drawers	Matching refrigerator
