

CO<sub>2</sub> Incubators

**Incu**Safe

Optimising cell culture outcomes and reproducibility IncuSafe CO<sub>2</sub> Incubators provide precise control of CO<sub>2</sub> concentration and accurate, uniform, and highly responsive temperature control within the chamber. During cell culturing the inCu-saFe germicidal interior and SafeCell UV lamp work continuously to prevent contamination.

#### MCO-170AIC-PE

#### **Precise & Regulated** Environment

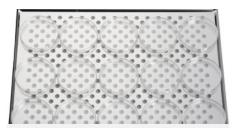

InCu-saFe and SafeCell UV both function to prevent contamination. the temperature whilst the Dual IR sensor controls the

#### **Time-Saving Decontamination**

#### Ease of Use & **Maintenance**

165 L

A full colour LCD touchscreen allows full control a USB port. The easy-tocorners and integrated

**Optimum Cell Growth** Outstanding quality and performance for successful cell growth, optimal results and reproducibility. Perfect fit for the strictest and most sensitive protocols.

**Efficient Workflows** Complete laboratory procedures and experiments more efficiently with less incubator downtime. Ideal for commercial applications.

Intuitive Usability Control and visibility of the internal conditions, such as CO<sub>2</sub> level and temperature, is easy with the MCO-170AIC CO<sub>2</sub> incubator.

### IncuSafe CO, Incubators

#### **Direct Heat and Air Jacket System**

Achieves accurate, uniform, and highly responsive temperature control within the chamber, providing exceptional uniformity and rapid recovery after door-openings.

#### Dual IR CO<sub>2</sub> Sensor

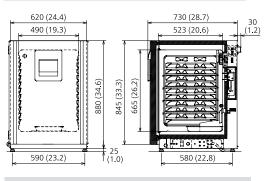

The incubator's Dual IR sensor and P.I.D control enables ultra-fast CO<sub>2</sub> recovery without overshoot, even following multiple door-openings.

#### **Active Background Decontamination**

The exclusive inCu-saFe copper-enriched stainless steel alloy interor offers the germicidal properties of copper and the durability of stainless steel. The optional, isolated, SafeCell UV lamp decontaminates circulating air and water in the humidifying pan, without harming cultured cells.

#### **Condensation Management**

With a unique antibacterial coating, the 'dew stick'-controlled by Peltier technologycondenses water on its surface, which then drips into the humidifying pan, preventing unwanted condensation in the chamber and possible contamination.

The MCO-170AIC series is certified as a Class IIa Medical Device (93/42/EEC and 2007/47/EC) for medical purposes of culturing cells, tissues, organs and embryos.
