Biorack Series

The Biorack series of refrigerators provide highly efficient storage of bulk quantities of cryovials
Racking systems housed within these ultra-low loss cryogenic refrigerators enable users to store large quantities of Biomedical material over long periods of time, safe in the knowledge that storage temperatures even in the vapour phase, will be below -190°C

Advanced super insulation and ultra high vacuum techniques allow storage times between refills of up to 6 months

The Biorack Series are available in four sizes, with 750, 3000, 4800 and 6000 x 2ml Cryovial capacities
All Bioracks are supplied complete with racks and polycarbonate cryoboxes

Temperature Logger Alarm Unit

Part Number 9701321

Providing continuous dependable monitoring of the temperature within the refrigerator, the CryoGuard data logger is the ideal choice for users who want to record sample temperature over long periods

The unit has a 3 way audible alarm for:

- Low LN2 Level
- High temperature
- Low battery power

CryoGuard

All Biorack Series units are available with an optional Cryoguard low level alarm, this fitted together with an alarm plug can be calibrated for both Liquid and Vapour phase low level alarm.
(Alarm plugs supplied Free when the Biorack and Alarm is ordered together.)

Part Number 8602622

Product Features

- 5 YEAR VACUUM WARRANTY
- 4 models from 750 to 6000 cryovial capacity
- Durable aluminium construction
- Space saving for storage of IVF samples
- Ultra-low evaporative losses
- Compatible with all major cryobox brands
- Heavy duty lockable enclosure offers excellent security
- Liquid or vapour phase option available
- Temperature data-logging device available
- Storage of 96 well plates, straws, 5ml tubes, blood bags, canes and cord blood bags

Note: ¹Working times will vary according to container usage

*The Autofill option is not available for the BioRack 750

Add 99mm to the height if you include a roller base

Autofill with Cryostor option

The Autofill accessory option is particularly useful for the long-term storage of samples within vapour phase environments

The system works by continuously monitoring the LN2 within the Biorack and topping up the unit when natural evaporation causes the level to fall below a safe set-point, vital for the long term viability of the material being stored

This method is less economical in terms of LN2 consumption but provides the user with the ability to finely control the level within the unit over extended periods of up to 8 weeks between supply reservoir refills

Please note that the Autofill is designed to be used with the Cryostor Series and is available for the 3000,4800 and the 6000.

Liquid & Vapour Storage

Biorack range Liquid phase

If space is at a premium look at the Biorack range. The Bioracks can hold up to 72 Goblets (65mm) with a loss rate of less than 1 litre per day, making Bioracks a good space saving option for expanding laboratories. The Bioracks can also store 2ml cryovials, and racks can be mixed to make the best use of a vessel.

Biorack range vapour phase

Bioracks can store samples in vapour phase with a storage temperature of -185°C , and the Biorack design enables samples to have a built in reservoir of LN₂.

The Biorack 3,000 stores all goblets at one level, so there is no removal of any samples to access goblets at lower levels so excellent for Embryo storage. The Biorack 4800 can store cassettes in vapour phase, as well as 48 goblets, and the Biorack 6,000 can store up to 72 goblets (65mm).

For vapour phase storage it is recommended that a low level alarm is fitted.

Features

Autofill & Alarms

Biorack Autofill and Cryostor option (see next page) connected to Data logger, low level alarm and autodialler.

Easy withdrawal

Quick, easy storage and withdrawal of racks, combined with exceptional holding times make the Biorack Series a leading choice.

Roller Base

All Biorack models have a roller base option for easy manoeuvrability.

Quick easy storage

All Biorack series feature extra-wide openings for easy sample storage, access and retrieval.

Alarm plug and standard neck plug WALL RACK

Biorack alarm plug and standard neck plug rack, fits easily onto wall and stops any damage to sensors whilst accessing samples.
