

**Technology for Vacuum Systems** 

**NEW!** 

Compact, low noise, user-friendly:

### VACUUM ROTARY VANE PUMPS **5**

For about 100 years rotary vane pumps have remained a central part of vacuum technology. Nevertheless there is always something to improve. The new VACUUBRAND rotary vane pumps are:

XLEXTRA LIGHTWEIGHT XLEXTRA LOW NOISE

XEXTRA ENERGY-SAVING XLEXTRA USER-FRIENDLY

XS = E TRA SUSTAINABLE

# SPRING-LESS DIL PUMP - LESS WEAR NEW DIL CIRCUIT - LESS NOISE NEW MOTOR - LESS ENERGY CONSUMPTION

Two stage rotary vane pump RZ 2.5

Two stage rotary vane pump RZ 6

Two stage rotary vane pump

#### SPECIAL ADVANTAGES

• high conductance inlet

high pumping speed even at low vacuum

o high vapour tolerance

for water and solvents by gas ballast of about 10% of pumping capacity. Quieter operation and good ultimate vacuum also with gas ballast.

anti-corrosion design

important inner surfaces mechanically ground and plasma treated. Oil shut-off device against corrosive gases entering the pump whilst switched off.

new lubrication circuit and large oil volume

for quiet operation and longer service intervals

o compact design

smaller dimensions, low weight, ease of maintenance due to telescopic design

#### ... extra light-weight

Unmatched compact design and low weight; genuinely "portable".

#### ... extra low noise

Low vibration and ultra quiet running.

#### ... extra user-friendly

Enhanced reliability of wear parts with new lubrication circuit. Long intervals between oil changes. Ease of maintenance and assembly through new pump module design.

New motor layout with outstanding reduced current draw. Immediate re-start after shutdown (RE/RZ 2.5, 6 and 9). Electronic capacitor control (RE/RZ 9).

Inlet separator AK RE 6 - RZ 6

Inlet cold trap SKF H 25

Oil mist filter FO RE 2.5 - RZ 6

VACUUBRAND rotary vane pumps are designed for an ultimate operating vacuum in the range of 1 mbar to  $10^{-1}$  (single-stage) or  $10^{-3}$  mbar (two-stage). The wide range of models available fulfils both technical and economic criteria for

choosing the right vacuum pump. Selection of the appropriate pump depends upon the ultimate vacuum and pumping speed requirements of the respective application.

150 employees work in a flexible team structure to design and manufacture our products. Our focus

is to develop innovative products with excellent quality. VACUUBRAND

has over 40 years experience in

manufacturing vacuum technology. Our company offers the most com-

prehensive range of customer orien-

ted laboratory and instrumentation vacuum pumps, gauges and control-

The product range comprises high

performance rotary vane pumps, oil free diaphragm pumps, well proven pumping units, flexible vacuum

systems and solutions for local area

networks. The range is completed

by a wide choice of KF fittings

and accessories as well as various

vacuum gauges and controllers for rough and fine vacuum. The design

of VACUUBRAND products is driven

by our customer's requirements.

In recent years, vacuum local area networks with pumps combining the latest electronic control technology and high performance mechanics have gained more and

more importance.

lers for rough and fine vacuum.
