

heaters and stirrers

With a durable and chemically resistant ceramic surface, Cleaver Scientific's digital hotplate, stirrer and hotplate stirrer are the ideal solution for demanding users in all laboratory environments. The minimal footprint (18 x 26 cm) allows for use in crowded spaces such as fume hoods while the 16.5 cm square plate makes these units compatible with a wide range of commonly used vessels such as beakers, bottles and conical flasks. Fast and precise adjustment of speed and temperature is achieved with advanced microprocessor technology, and a large backlit LCD display offers easy viewing of current parameters. A safety LED indicates temperatures over 50°C. An optional external thermometer and support rod allows temperature control of the sample by direct feedback to the microprocessor, maintaining temperature to within $\pm 0.5^\circ\text{C}$.

magnetic induction stirrer

The Magnetic Induction Stirrer, ISTIR2, uses modern magnetic coil technology that has no moving parts resulting in a motor-less wear-free drive and maintenance free unit. High-quality rare-earth magnets are used in the stirrer design to ensure a strong magnetic coupling with consistent accurate alignment which significantly reduces the chance of spin-outs. Rapid acceleration and braking - less than 10 seconds, saves time and enables quick mixing of samples.

MagFuge®

MagFuge® is the first high-speed centrifuge (12,500 rpm) and magnetic stirrer (3L), combined into one unit. Programmable digital control for speed, time, reverse or oscillating direction enables protocols to be controlled precisely with settings easy to read on the back lit display. Safety features include imbalance and tilt safety cut-out, as well as a safety interlock lid to prevent opening while rotor is turning. Rotor sensing technology prevents the Magnetic Stirrer Rotor from being used above 2,500 rpm for user safety. Its housing is of durable, chemically resistant ABS and polycarbonate plastic, making the unit easy to clean and maintenance free.

KEY FEATURES

- Cost saving - two instruments in one
- Small footprint - ideal for labs with limited bench space and height
- Low noise level
- Long-life, maintenance free brushless motor and drive
- See web site for full technical details
