Benefits

The Advance Lab has 4 pre-programmed media cycles and 7 pre-programmed instrument cycles for you to select depending on your sterilisation requirements. Further to the standard programmes the Advance Lab has 1 programme that can be defined by you, to allow you to determine the temperature and hold time.

Additional Information

Up to 15 minutes extra drying time available for irregular loads

Average Power Usage Per Cycle Max 16L 0.5kwh Max 22L 0.6kwh

Approximate Cost Per Cycle

16L 5.87p 22L 6.03p *UK only

Note: Calculations are based on a 134B cylce from a warm start.

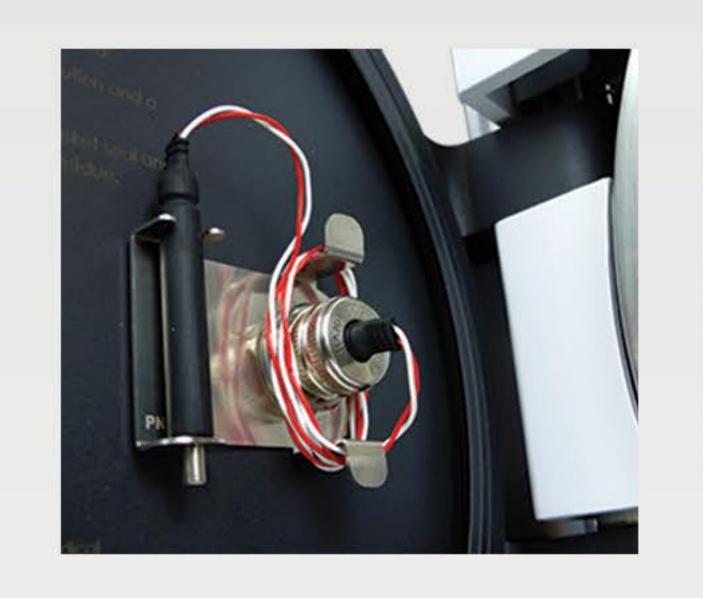

Average Water Usage Per Cycle Vacuum cycles 750ml (typical) Non-vacuum cycles 450ml (typical)

The Prestige Medical media tray allows the user to load large media bottles and flasks of varying sizes in conjunction with our Prestige Medical FlexiRack system

The media tray is available for both 22L and 16L models

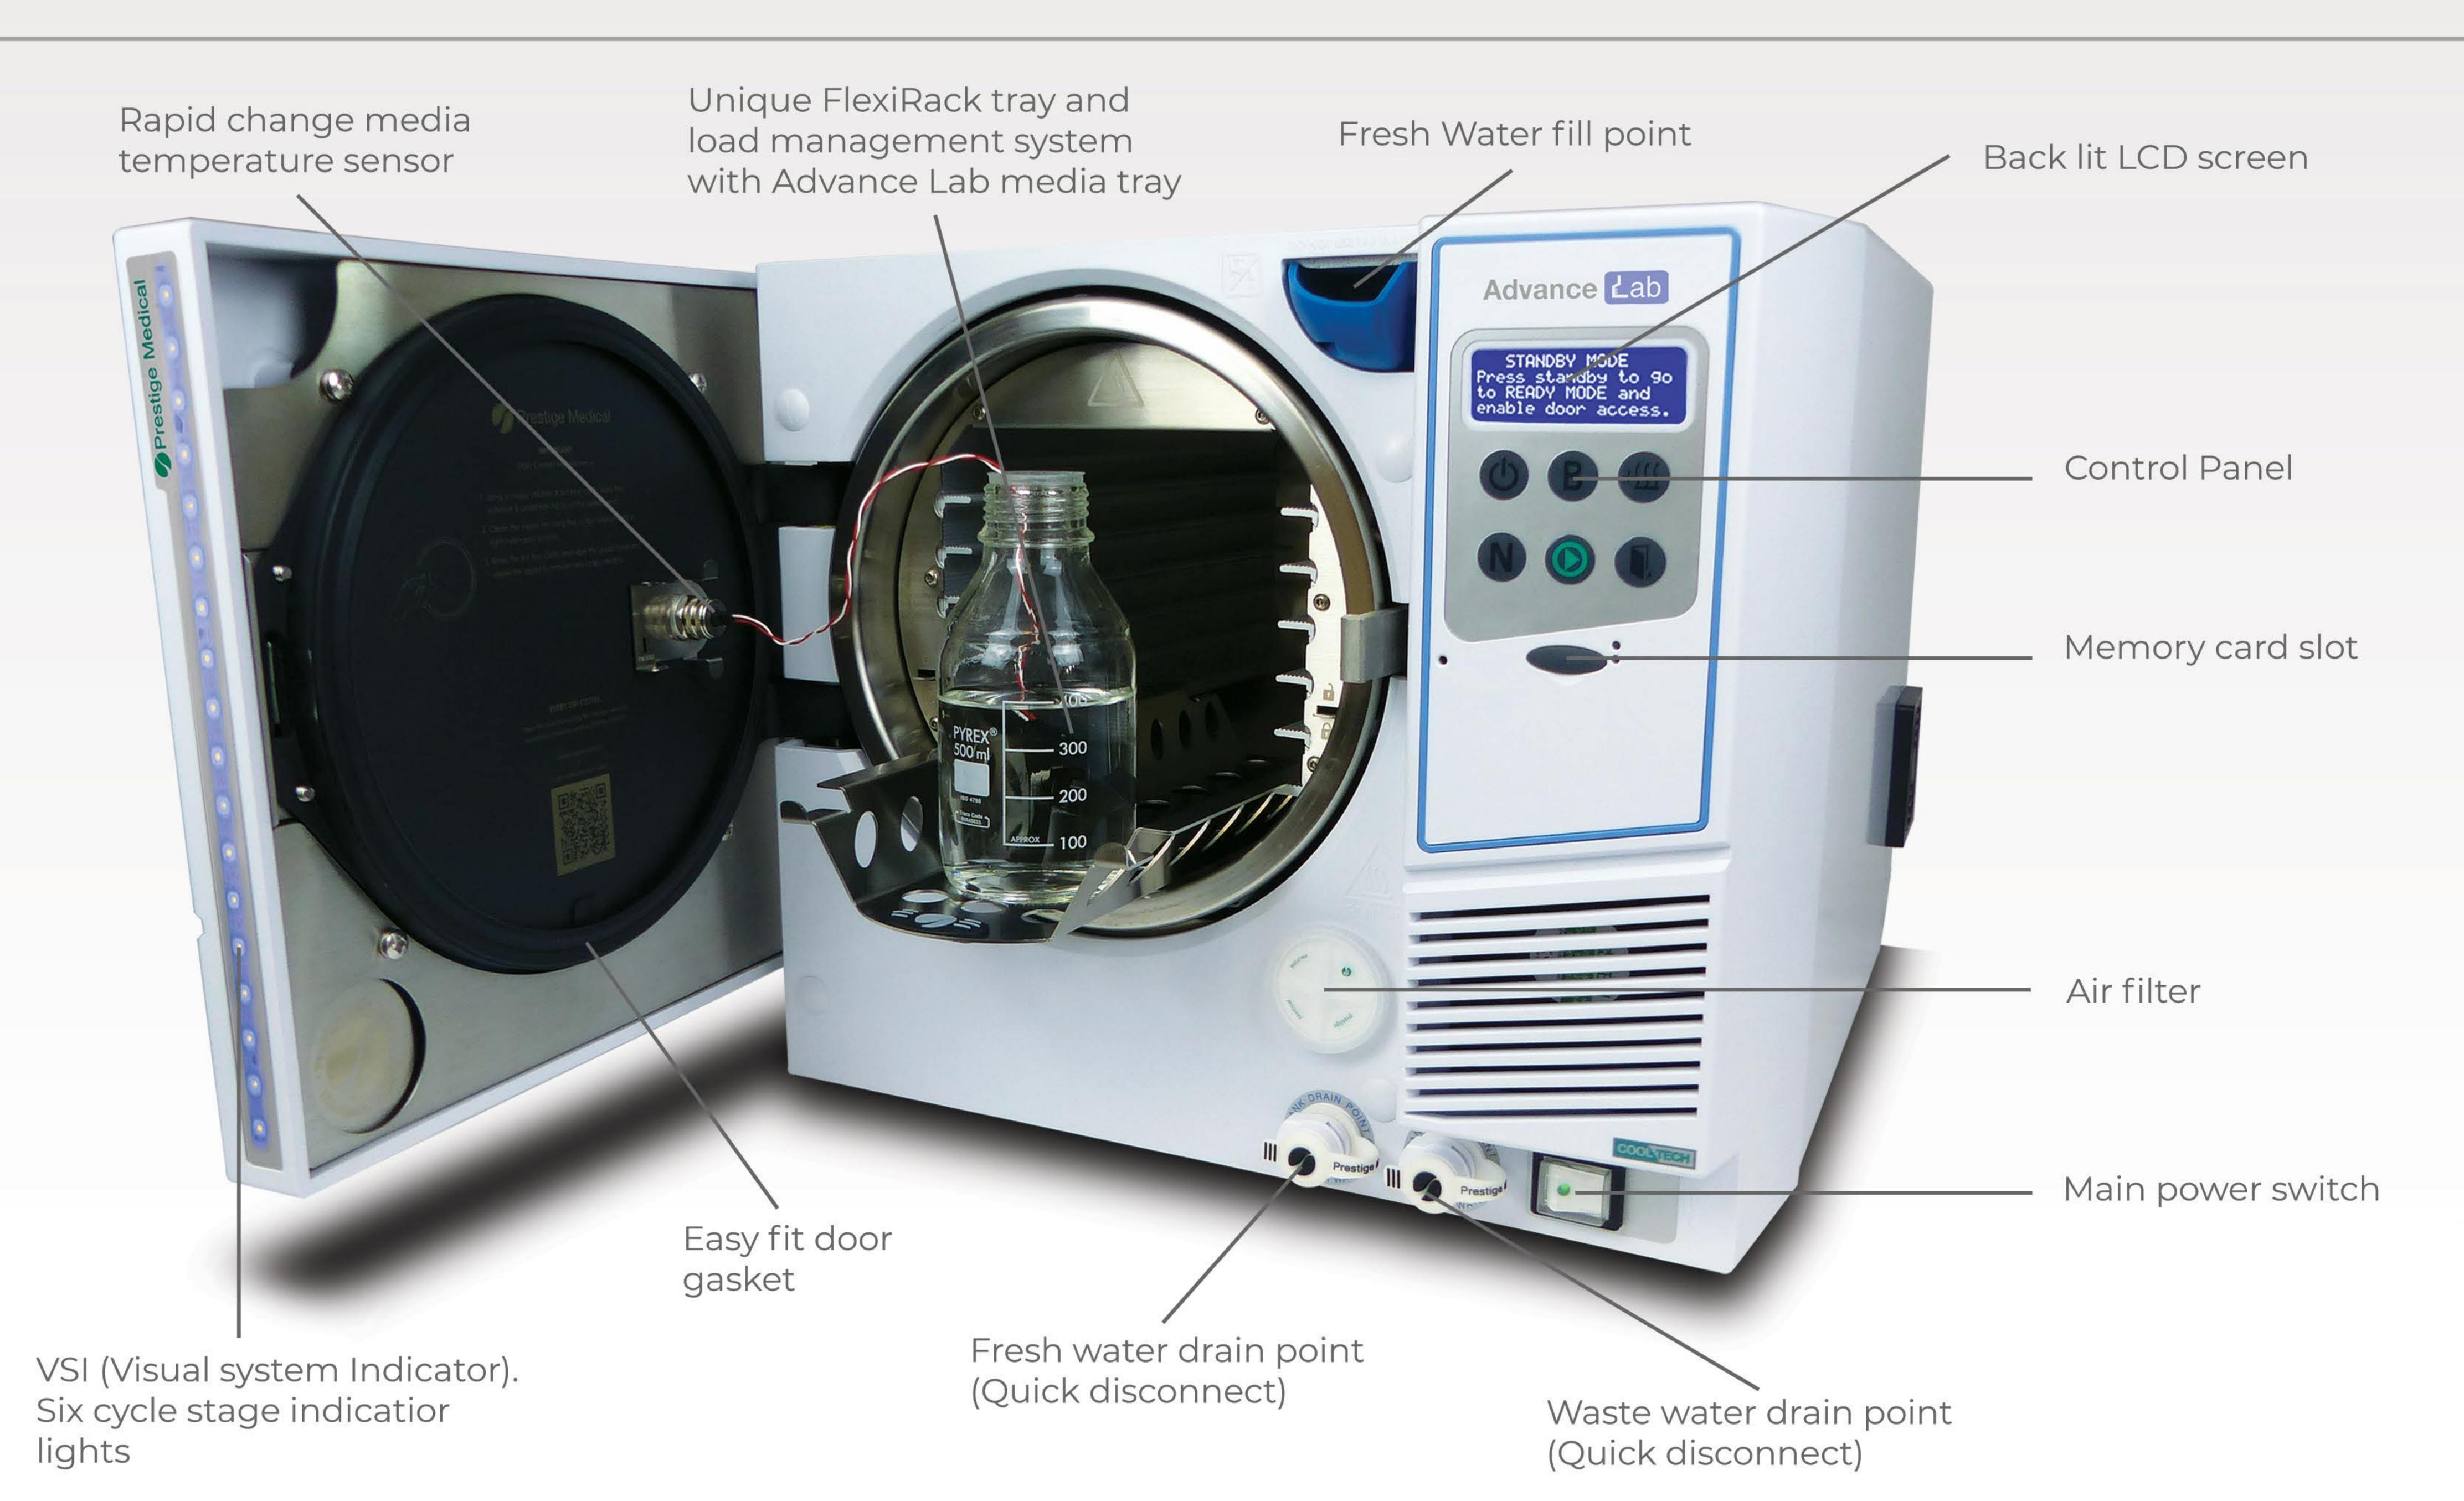

A "rapid change" integrated flexible PT100 reference sensor controls the temperature of the liquid in all liquid programmes and prevents the chamber door from being opened at high media temperatures

Our industry unique Prestige Medical Advance Lab reference sensor can be easily replaced in the event of damage or wear
