Cytology Range

Our Pro-Cyt range are compact and practical centrifuges for small , medium and large sample volumes. Unlike others we offer you a choice of two Centrifuges and each can use one of three rotors, from 4, 8 and 12 places, thus meeting your needs exactly.

They are both cost effective, yet still benefiting from the superb build quality and engineering of our research series.

Centurion centrifuges, with their applications-oriented accessories, are proven favourites in clinical, cytology , histology and small medical laboratories. Our compact, ergonomic design: smaller dimensions, ergonomic height and curved features ensure a comfortable and efficient workspace. Our Centrifuges deliver optimum performance in compact units, designed for ease of use. Quiet (below 50Db, rotor dependant) with low heat operation noise levels have been reduced while maintaining sample integrity with good airflow .

Performance and safety are top of our agenda, tight operational control is maintained by the microprocessor. An imbalance sensor is incorporated into the control loop to bring to a controlled stop of the centrifuge in the case of a tube rupture or incorrect loading.

Centurion centrifuges have been an industry standard for quality and reliability for 27 years, our centrifuges can be relied upon to deliver safe, reproducible and trouble-free results for many years.

Warranty 2 years for all models

Centurion brand centrifugation products are part of a dedicated range of products and services designed to provide you with quality equipment and support.

Choosing The Right Centrifuge

A centrifuge is a critical piece of equipment. Therefore, when the time comes to add new centrifuges or replace old models, it is important to make an informed decision. Bringing together technological and design excellence, Centurion have paved the way for a new generation of centrifuges.

We reserve the right to make changes with ongoing research and development.
