Cerastirs™ CH series, Ceramic Hob

These popular Clifton® ceramic hotplate stirrers are designed for general laboratory requirements and are available in three styles - Cerastir™ CH-1 series - analogue, Cerastir^{dig} CHS-1 series - digital or the larger analogue Cerastir™ CHS-2.

Using a ceramic glass heating surface resistant to most chemicals, the plate can be precisely controlled, spillages are directed away from the controls and user. Smooth start up and changes in stirring speed ensure that the follower increases or decreases its mixing speed without detaching.
