EUROSTAR 20 digital Overhead Stirrer

/// Data Sheet

The new generation of EUROSTAR overhead stirrers combines modern design, user-friendliness and reliable performance. With up to 23% less space required compared to the previous models they fit perfectly into any laboratory.

EUROSTAR 20 digital is the right solution for simple mixing tasks up to 25 liters (H2O) and viscosities up to 10 000 mPas. Its maximum torque of 40 Ncm and linear adjustment to 20 Ncm at maximum speed guarantee reliable and powerful performance.

The innovative torque trend measurement shows the viscosity trend of the sample (+/- 6 Ncm accuracy). The torque

trend is shown directly on the display and provides important feedback on the mixing process. The desired stirring speed 30-2000rpm is always guaranteed even with changes to the torque demand or viscosity of the material.

ISO Class 7/8 Cleanroom Compliance allows for use in cleanroom environments in pharmaceutical, biotech, medical device, electronics, and aerospace labs, industries where particle control is critical.

Maximum safety and reliability
•User-friendly: Large LCD display shows all parameters at a glance
•Quick Sense Keyless Chuck: allows the mixing tools to be changed with one hand, without additional tools
•Lock key: Prevents accidental changes to settings
•Safety Circuits: automatic safety shutoff from stirring impeller blockage or user specified torque limit
•Protection class IP 54: Resistant to splash water and steam for reliable use in demanding environments
•Brushless motor: Durable, clean and quiet in operation

Connectivity and documentation
•USB and RS232 interfaces
•Compatible with labworldsoft® laboratory software for integration into digital workflows and documentation of processes
